STORIES BEHIND HOSPITAL WALLS

GYNECOLOGIC ONCOLOGY DEPARTMENT
GENERAL UNIVERSITY HOSPITAL

PRAGUE
CZECH REPUBLIC

2017

During the year 2017 I took about 3000 shots from behind of the largest oncogynecologic unit in The Czech Republic — The Gynecologic Oncology Unit Of The General University Hospital in Prague where more than 500 new patients with malignant gynecological tumors are treated every year, more than 500 precancerous patients are taken care of and more than 11,000 outpatient examinations and consultations are carried out, 350 radical operations and 600 additional one-day surgeries are performed there every year.

The series has not been exhibited yet.

The Book “The Stories Behind Hospital Walls” was released in 2018 (384 pages, publisher Jonathan Livingston).

The Book is available in English/Czech version and could be used as a accompanying towards the exhibition.

The book is visually telling the story from the view of invisible visitor who goes through the same path as the the patients go — through the hard path towards the light and hope — via chapters — Outpatient Office / At The Crossroad, Corridors / The Circle Of Comings, Leavings, and Waitings, Ultrasound / Light In The Dark, Imaging / Behind The Glass, Inpatient Department / Where Time Is Running Differently, Operating Room / Master Hand Symphony, Chemotherapy / Silent Waiting For Life, Medical Room, Windows / You Will See The Trees Bloom Again.

For this series I selected few moments from the huge material.
